**NOTES:**

- \*1 - Adds an extra 70mm seat depth (to 530mm)
- \*2 - makes the back posts 30mm wider than the seat rails. (useful if fitting a seat board)
- \*3 - Extended back posts give an extra 100mm of tube length between the two horizontal back rest bars. (may aid with mounting of backrest hardware) - They will become standard at no extra cost mid way through 2024
- \*4 - Allows interfacing of many types of specialist seating (eg Ottobock parallel adaptor, R82 and many others)
